

THE SIERRA CLUB NEWSLETTER FROM CLAIR TAPPAAN LODGE (CTL)

**SPECIAL BULLETIN**

## COVID UPDATE

By Alice Harten, CTL General Manager

We look forward to welcoming old and new friends back to CTL and Hutchinson on **April 1, 2022**. Peter Grubb and Bradley huts will be open December through April. Send email inquiries to [info@goclairtappaan.com](mailto:info@goclairtappaan.com)

### CLAIR TAPPAAN LODGE

We do not anticipate a delay to CTLs opening April 1. We are currently accepting reservation requests only from our Outdoor Education partners, other regular groups, and gatherings such as weddings. All other reservations will be accepted by phone or email starting January 10, 2022. However, you can fill out a booking request form on our website now ([Book CTL](#)) for a January 10 response.

### HUTCHINSON LODGE

Exterior fire mitigation work was done this fall along with interior fire safety work. All wood has been removed from the wood storage area and stacked outside away from the building. We still have a few projects to complete prior to reopening. It has been a challenge getting licensed contractors during the pandemic but we are still hoping for an April 1 opening date. We are not taking reservations at this time.

### BACKCOUNTRY HUTS

We are taking group reservations only for Peter Grub and Bradley huts; pre-covid, individuals and small groups could stay in the huts together. We have reduced maximum occupancy to assist with social distancing. We have left COVID-19-approved disinfectant and hand sanitizer in each hut and are asking that groups wipe surfaces down upon arrival and before departure. We are also sending in staff once a month to perform a thorough cleaning causing a slight increase in price.

**Bradley Hut** - maximum 8 (used to be 12)

Cost \$325 + 10% Transient Occupancy Tax

**Peter Grubb** - maximum 10 (used to be 15)

Cost \$375 + 10% Transient Occupancy Tax

Benson and Ludlow huts are locked and could open April 1, 2022 depending on the winter. These two huts still need repairs and hantavirus cleaning prior to opening.
